Using the History palette You may not realize that Photoshop has a history palette, and it isn't hidden like in older versions of Photoshop. To access this tool, choose Window⇒History. The History palette (Figure 3-1) shows the images that have been modified to create the current image. You can see which image was the starting point for the image you have now. The tool's arrow next to the image indicates the amount that has been modified in the image. You can also look at the History palette for the selected object in the image. In Figure 3-1, the car has had the color red

added to it. I made the car look like it was part of a painting by lowering the black car and increasing the red area, and I've highlighted the changes with an arrow so you can see the results. You can use the History palette to undo changes to an image as well as to access the original image that was the base of the current image. In the figure, for example, the red arrow points to the original image, and the gray arrow points to the image that has been changed. When you use the History palette, you may be drawn to the opportunity to go back to older versions of an image. Unfortunately, you can't go back further than the last five versions. To get the

---

older versions, you need to use a special Photoshop plug-in that maintains a record of those previous versions. In the following sections, I describe how you can use the History palette to access previous versions of an image. If you want to access the History palette without going through the steps above, choose

Modern day electronic devices can communicate with other electronic devices using different communication protocols. For example, in cellular systems, a cellular phone can transmit and receive data based on a cellular standard like Global System for Mobile communication (GSM). However, the cellular phone might not be able to effectively communicate with other devices that use other transmission protocols. For example, the cellular phone might not be able to effectively communicate with a computer or a personal digital assistant. Accordingly,

It was one of those first impressions kind of things, where you quickly get to know someone when you've been in their house once. Like they're a hard ass, mean as hell, nice as a button, the kind of person you'd be like "Ya. I don't know who this is, but he's cool." But that kind of person you'd meet only once (honestly, for most people, that's once and then you're out) and then she's back. So this guy was the only person she'd been with that I'd seen before. She doesn't just get to know me because I'm cool or nice. The whole

I don't know what happened to him (if it did, she didn't tell me), but this was her last run with someone she was "serious" with. It lasted two months, but for whatever reason, it just didn't work. And this is her past now, out of the way, so she could just be with a new guy. And then we talked about how all the trees were glowing from the lightening... and then I saw her friend, Jen, walking to her car. And I couldn't look away. She's a beautiful little brun
