The Autodesk Revit suite contains Revit for drafting and BIM 360 for documentation. AutoCAD is available as a desktop and cloud-based app. AutoCAD's user interface is a state-of-the-art drag and drop interface for drawing, designing and editing geometry. The interface can be fully customized, and AutoCAD can be used in a number of different ways, depending on the user's preference. The interface features a familiar tool bar at the top of the screen, along with a number of window panes that contain tools that can be activated and resized, and dragged onto any open area of the screen. The interface also allows for simultaneous editing of geometric and attribute data, and the user can double click a layer name to quickly adjust the visibility of all layers below it. The newest version, AutoCAD 2020, was released on August 8, 2019. The full versions of AutoCAD and AutoCAD MEP are available for Windows only, although it is possible to use AutoCAD with macOS and Linux through third-party applications like Wine, or natively through direct access to an operating system's file system. AutoCAD's mobile apps are available on iOS, Android, and Windows 10 Mobile devices. Intended Uses Some products use the output of AutoCAD's drafting and editing tools to generate engineering documentation. Some products use the output of AutoCAD's drafting and editing tools

Units The 'points' unit is the default unit for AutoCAD. This unit is also used for 2D drafting. The points unit may also be referred to as points, mm, mm2, or px. Keyboard Shortcuts Many shortcuts are available to AutoCAD users. All of these shortcuts are available from the keyboard, which is why they are called keyboard shortcuts. 1. Reset - Cancels the current command. 2. Esc - Disables any command from taking effect and returns the user to the command prompt. 3. Tab - Selects the command to be executed. 4. Alt - Does the same as pressing the Alt key. 5. M - Changes the active view. This shortcut is assigned to both the View menu and the General menu. 6. O - Changes the active layer, which is assigned to both the Layers and Layers/View menus. 7. A - Changes the active dimension. 8. P - Puts the cursor on the last active dimension. It is usually used with the 9. I - Begins a new dimension. 10. T - Takes the selected object out of object snap. 11. R - Refers to the named reference. It is used to zoom in or out of the drawing. 12. - Places the active dimension on the current object. This is done by starting a new dimension on the current object and selecting it in the drawing window. 13. '-' - Executes the last action command on the drawing. If the last command was not an action, this makes the cursor turn into a hand. 14. C - Changes the current selection. 15. Ctrl + M - Changes the active layer and dimension. This is done by selecting the dimension and pressing the Tab key. 16. Ctrl + I - Adds a new dimension. This is done by selecting the first dimension in the drawing window and pressing the Tab key. 17. Ctrl + U - Unplugs the current dimension. 18. Ctrl + F - Begins a fresh view of the drawing. 19. Ctrl + A - Changes the active object. 20. Ctrl + P - Plugs the current dimension. 21. Ctrl + T - Changes the dimension type. Types can be: 1. Calc.
