Integrated Product Lifecycle Management tools. These allow exchange of CAD information between Autodesk and other companies like HP, ADE, Inventor, Creo and others, and each tool is compatible with its respective applications. It can include data mining and analysis tools for BIM. Dimensional and other data from existing drawings can be extracted through import and export options. Computer-aided design tool extensions such as Design Web allow users to use web browsers, not only to view drawings, but also to interact with them in other ways, including the ability to create and edit drawings. Building Information Modeling (BIM) In 2011, Autodesk released Autodesk Revit and BIM 360 services that provided building information modeling. Autodesk Revit, a "go-to" 3D building modeling program, allows users to create high-quality 3D models in just a few minutes. Autodesk BIM 360 services include BIM 360 Team, which is a cloud-based collaborative platform that provides access to shared information in the cloud. The Autodesk BIM 360 Team platform, along with Revit, allows users to collaborate and share information. In 2019 Autodesk announced its complete move from the old C++ compiler to the new Microsoft Visual C++ compiler. Product lifecycle management Autodesk provides facilities for managing the life cycle of products including: Design Creo Autodesk's Design Web application was a web-based tool that allowed users to create, modify and view documents on their web browser. The design web application was renamed to Creo on August 1, 2012, and was discontinued on June 30, 2016. Autodesk Revit Autodesk Revit is a 3D building design and construction modeling software package, for use on personal computer, tablet computer or embedded devices. It is designed for professionals including architects, engineers and contractors. Autodesk Revit is available in 11 editions which cover different areas of engineering. The latest version of Autodesk Revit is Autodesk Revit 2018. Autodesk Fusion 360 Autodesk Fusion 360 is a cloud-based platform for mixed-reality design and engineering. It was unveiled on August 30, 2015 and is offered free to Autodesk subscribers for a limited time.
