Circle of Life is the origin. 1 Sep 2015 Update: Google Play Store has changed their privacy policy and now users are able to search history at any time. google.com/history. The Mach3 R3.042.40 [FULL Version] is needed to start. 1 December 2015, Linux. Mach3 r3.042.40 [FULL Version] download temp 1.rar.Q: python: iterating over an iterator/list made from a string using for loops I am trying to create a dictionary from a string and can't get it to work. I can print the dictionary out just fine but I can't loop over the values in the dictionary in a for loop. I have it right now: user_input = input("> ") user_dict = {} for c in user_input: user_dict[c] = 0 But that doesn't work. The input looks like: "Hi! My name is Daaaaaaaaa". My question: How would I make my for loop look at each character and store a 0 in the dictionary? A: input returns a string. You need to iterate on that, not the string itself. user_input = input("> ") for c in user
