provider of custom PCs, via a transaction that brings its line of Windows devices under its corporate umbrella. The Microsoft Windows division is relaunching its current
operating system, Windows 8, which will be available in two different versions: 8.1, and 8.1 Update, the latter of which is expected this month. Microsoft is expected to
initially launch the new OS on the new Surface Pro 3 tablet, and tablet with keyboard cover that is expected to go on sale in October. The Surface and associated product
lines will be pushed hard, with Microsoft working to replicate the success of its earlier Surface devices, which were available only on the web. Lenovo, HP, and Dell were
most recently blocked by the United States government from offering Windows 8 tablets. There are other companies offering Linux-based tablets and convertibles, but
Windows remains the only game in town. Microsoft, by contrast, already sells Linux-based tablets through its Surface tablet line and is offering PCs through the affordable
Windows 8 Pro devices. EliteBook via The Verge Winning over users with a decent PC EliteBook via CNET EliteBook, which started in 2006, was founded by two engineers
in Cork, Ireland. Paul Hodgetts and Paul Smith first launched a series of high-end PCs that they used for themselves. EliteBook PCs are custom computers, loaded with the
latest hardware, designed to be used by corporate users. Paul Smith of EliteBook said that the EliteBook line currently consists of a number of PC models aimed at the high-
end corporate markets, and that in 2011 it plans to move into business-oriented PCs. It aims to create products that are not only more attractive to consumers, but which

A report is presented of three patients with carcinoma of the pylorus and carcinoma of the cardia, two of whom are surviving from 12 to 19 years after resection of the stomach with Roux en Y reconstruction, and the other from 7 to 13 years after total gastrectomy with proximal and distal esophageal reconstruction. The surgical resection without removing the perigastric lymph nodes according to McMillan & Dellon's classification seemed to be effective in prolonging the life of the patients. Shenae Grimes of Big Sean's "I Am... The 16oz." became a viral sensation when it hit #1 on SoundCloud last year and a big hit for her on the mixtape circuit. Now the lead song of her upcoming album adds another notch to her belt, as Blender has declared her "the best MC of the decade."

The list is rife with controversy; Drake and Lil Wayne, among others, make appearances. But amid the large crop of hip hop and rap headliners who are judged by Billboard and DJBooth and Rocafella and Vibe, Grimes is the unrivaled winner. Here are the others to whom BPM has given an accolade of high regard: Larry at the bottom. The early cerebrospinal fluid characteristics in surgical patients with spontaneous subarachnoid hemorrhage: a randomized trial. Proximal aneurysms are the major cause of subarachnoid hemorrhage (SAH). This study examines whether the early cerebrospinal fluid (CSF) changes that correlate with early cerebral ischemia differ between the hemorrhage and the control group. The authors performed a prospective, randomized controlled, double-blinded, clinical trial with 91 patients with spontaneous SAH and 40 healthy controls. All patients underwent CSF samples at the onset of neurosurgical care. The authors measured CSF concentrations of glucose, lactate, and the lactate/pyruvate ratio (LPR), and 6d1f23a050
